Network Infrastructure Assessment

**Network Infrastructure Assessment Overview**
Today's networks are becoming increasingly complex. Support for critical enterprise applications and converged communication systems have created unparalleled expectations for network availability and performance.

Insight Networking's Network Assessment service will help you ensure your network operating at peak efficiency and is ready to support your business. Network Infrastructure Assessments utilize industry best practices, best in class tools and a proven methodology that produces actionable recommendations for network remediation and improvements.

**Network Assessment Benefits**
IP networks have matured. Many networks in production today were built in the late-90's. Others were patched together as part of multiple company mergers. Best practices for network structure and configuration have evolved and improved. At the same time, network infrastructure has become more complex. More and more services, such as wireless and mobility are being integrated into the network. Technology trends such as convergence, virtualization and data center consolidation have placed new demands on the network.

The result is that many networks:

- Are not designed based on industry best practices for availability and performance
- Have outdated hardware and software platforms that are no longer supported by the manufacturer
- Are not designed to support real-time applications such as IP Telephony, IP Video, ERP or CRM
- Require higher than average operational costs because they are difficult to troubleshoot, maintain and operate

**Network Assessment Offerings**
- Operations Assessment
- Convergence Readiness Assessment
- Security Assessment
Success Stories
We have successfully executed network assessments for a wide range of clients in multiple industries, from Fortune 100 companies to rapidly emerging businesses, including:

- Top 10 US cities with 13,000 internal users and over 200 WAN locations
- Fortune 500 tax preparation and financial services firm with over 1000 locations
- Large outsourced call center company with US and International locations
- Regional Midwest bank with 50 branch offices

Fast Facts
- Cisco Gold Certified Partner
- HP Platinum Partner
